Compliance rules a giving platform can’t skip

SWIPE

Screen where every gift passes

One function every donation route goes through, before a record is written or a payment exists.

Decline without saying why

Telling someone they matched a sanctions list is itself a violation, so the message stays neutral.

If the check fails, so does the gift

When the lists can't be queried, the donation is declined. A check that switches off protects nobody.

Record the passes too

Logging only the blocks can't prove you screened everyone. Clears go on record alongside them.

Tune the name match

A naive check flagged six of twenty ordinary names. One extra word of slack brought it to three.
